COMPANY SNAPSHOT

Chile's trash is Eco-Lógica's treasure. Based in Santiago, where 98% of companies fail to comply with environmental policies, Eco-Lógica helps its industrial clientele reduce, reuse, and recycle. Juan Pablo and Francisco Marín have developed a comprehensive, end-to-end corporate waste management solution that allows clients to dispose of waste safely and efficiently. As the only player in Chile with its unique blend of waste disposal services, Eco-Lógica is uniting Chile's formerly distinct waste management sectors for solid waste, hazardous waste, and recycling.
